

IP Office Conferencing

Cost-effective Collaboration

Overview

Avaya IP Office comes with a 128-party conference bridge to help small businesses collaborate seamlessly and cost-effectively. Businesses currently spending on conference calls with a service provider can reduce or eliminate those costs entirely. IP Office Conferencing employs easy-to-use conference control features to help keep people connected and making decisions faster.

Capabilities

Built-In Conferencing – The 128-party conference bridge (up to 64 parties on a single conference) come standard with IP Office, enabling associates to easily set up conference calls “on the fly” – no additional equipment required. Participants can be easily added while a conference is in progress. Run multiple conference calls simultaneously.

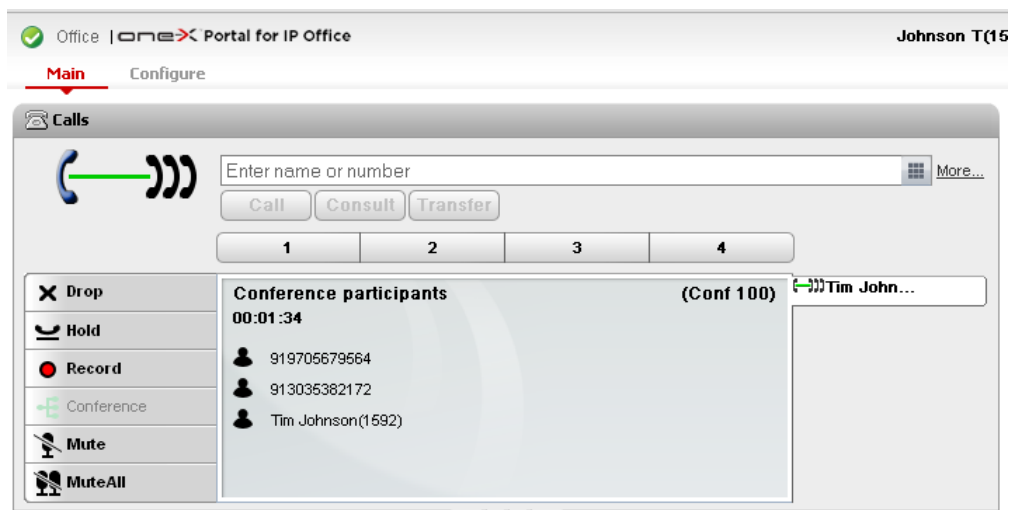

Enhanced Control and Capabilities – With IP Office *Preferred* or *Advanced Editions*, businesses get added security, control and conferencing power. Visually keep track of who’s on the call with the available *Power User*, *Office Worker* and *Teleworker* solution PC interfaces. Automatically invite internal associates to join conference calls with the optional *Receptionist* solution. Create conference calls by dragging and dropping speed dial icons on a PC interface; add external callers to a conference at anytime. Increase security with the addition of Personal Identification Number (PIN) access to any conference call.

Quick ROI

Businesses that currently schedule conference calls with a service provider can realize a quick and significant return on investment with IP Office. Just a few one-hour conference calls a day with four participants (or any equivalent), can result in an ROI of as little as three months. (Exact return depends on business location and provider fees.)

Benefits

- **Reduce monthly costs** – Reduce or eliminate ongoing conferencing fees, resulting in a quick ROI for IP Office
- **Cut travel expenses** – Reduce both the expense of travel and the unproductive time spent away from the office
- **Enhance collaboration** – Regularly-scheduled conference calls help keep everyone working together efficiently and effectively
- **Increase productivity** – Shorten project times, speed up decision-making, and be more productive though on-the-fly “meet me” conferencing
